

Shift displacement: the dominant overtime mechanism

4,151

cases displaced
into a different shift

5.2% of total

398

minutes
mean start delay

≈ 6h 38min

-22

minutes
duration deviation

shorter than planned

10.4

minutes
mean overtime

modest overrun

Displaced cases finish on time or early. They run into a later shift because upstream delays pushed them across the shift boundary.
